PROFESSIONAL SUMMARY

React Native Developer with 3+ years of experience in cross-platform development of high-performance mobile applications for iOS and Android. Expertise in CI/CD, unit testing, app performance monitoring, and state management. Strong experience with Firebase, push notifications, REST API integration, debugging, and secure coding practices. Proven track record of deploying 8+ apps on App Store and Google Play. Experienced in Agile environments with scalable and maintainable architecture.

WORK EXPERIENCE

Product Developer – MEETCS Pvt Ltd (July 2023 – Present)

• Designed, developed, and deployed high-performance cross-platform mobile applications using React Native, improving user experience and app stability.

• Published 8+ mobile applications on App Store and Google Play Store with zero critical production issues, managing end-to-end CI/CD and release cycles.

• Improved app crash rate by 30% and reduced load time by 25% through performance optimization and memory management.

• Integrated REST APIs, payment gateways, SMS services, Bluetooth features, Firebase, and push notifications.

• Designed and implemented mobile customer journeys aligned with business goals and enhanced user experience.

• Implemented state management using Redux and **followed Architecture pattern MVVM** to build applications using component-based architecture for scalability and maintainability.

• Optimized application performance through monitoring, debugging, and utilization of observability tools.

• Conducted unit and component testing to ensure code reliability, readability, and quality. **Implemented unit and integration tests using React Native Testing Library (Jest/Enzyme), improving code reliability and reducing production bugs.**

• Followed secure coding practices and risk-aware development aligned with regulatory and compliance standards.

• Contributed to scalable mobile architecture and reusable component design.

• **Owned end-to-end delivery lifecycle**, taking ownership of features from development to production deployment.Collaborated with product managers, designers, and cross-functional teams in Agile/Scrum environments and participated in code reviews.

• Resolved production issues using logging and monitoring tools, ensuring high availability.

Intern Product Developer – MEETCS Pvt Ltd (Jan 2023 – June 2023)

• Assisted in development of mobile and web applications using React Native and PHP CodeIgniter.

• Worked on API integration, debugging, and feature enhancements.

PROJECTS

Talenticks – Workforce & Payroll Management Mobile Application

React Native, Redux, REST APIs, Firebase

- Developed and deployed a production-grade HRMS & payroll mobile application on the Apple App Store, supporting end-to-end employee lifecycle and financial workflows
- Engineered secure, scalable REST API integrations for attendance tracking, employee management, and real-time workflow automation
- Implemented role-based access control (RBAC) and secure authentication mechanisms to safeguard sensitive employee and compensation data
- Designed and integrated financial-impact features including payroll insights, leave-to-salary mapping, and expense reimbursement workflows
- Built a real-time notification system using Firebase Cloud Messaging, improving workflow efficiency and user engagement
- Optimized application performance by implementing lazy loading, API optimization, and efficient state management, resulting in faster load times and smooth UX
- Developed data-driven dashboards for attendance trends and employee activity insights to support operational decision-making
- Followed modular architecture and scalable state management using Redux, ensuring maintainability and future extensibility

App Store: https://apps.apple.com/in/app/talenticks/id6759371230

SIMSREE LMS – Learning Management System

• Tech Stack: React Native, Angular, REST APIs

• Features: Course management, student dashboards, real-time updates, cross-platform support

• Available on both iOS and Android with optimized performance and scalability

TECHNICAL SKILLS

• Programming: JavaScript, TypeScript, PHP, SQL

• Mobile: React Native, Redux, Cross-platform development

• Backend: Node.js, CodeIgniter

• Tools: Git, Postman, Xcode, Android Studio, CI/CD

• Concepts: REST APIs, Debugging, Performance Optimization, Unit Testing, App Performance Monitoring, Agile, State Management, Firebase, Push Notifications, Secure Coding

EDUCATION

Master of Computer Applications (MCA) – DES Navinchandra Mehta Institute (2021–2023)

Bachelor of Science in Computer Science – BNN College (2018–202
